Experience

Feb 2023- Software Engineer - 5G Transport Network, ERICSSON.

Present • **Job Description**: Mid-Senior C++ Developer.

- Recognized as one of Key Contributors in 2024 and awarded with stock options.
- \circ Contributing to the development of enterprise-level software for the 5G/6G TN.

Jun 2022- Computer Vision Software Engineer - Metaverse Volumetric Video, Spaceport.

Jan 2023 • **Job Description**: Computer Vision Engineer, Python/C++ Developer.

- Conducted R&D on dynamic 3D scene reconstruction from multiple stereo pairs.
- Established a 3D Video capturing setup with multi-sensor calibration and spatio-temporal alignment framework.

Sep 2021− Computer Vision Software Engineer - Autonomous Driving, FORD OTOSAN .

May 2022 • **Job Description**: Computer Vision Engineer, C++ Developer.

- Established a multi-sensor calibration/alignment framework.
- Conducted research on monocular 2D/3D object detection and obstacle detection.

Aug 2018- Software Design Engineer - Embedded Systems/Computer Vision, Meteksan Defence.

Apr 2021 \circ **Job Description**: Computer Vision Engineer, C++ Developer.

- Created Board Support Packages for Linux distributions.
- Developed C++ applications and cross-compile methodologies mostly on Xilinx UltraScale Architecture.
- Developed and deployed Face Recognition deep learning models on Windows/Linux servers.
- Developed and deployed License Plate Recognition solutions on NVIDIA Jetson Platforms.

Education

PhD 2027 Middle East Technical University A.

- Program: Graduate School of Informatics/Computer Science.
- o Highlighted Courses: Computer Vision, Machine Vision, CUDA, Machine Learning, Deep Learning.

MSc 2023 Middle East Technical University A.

- Program: Graduate School of Informatics/Computer Science.
- Thesis: A Transformer-Based Approach for Fusing Infrared and Visible Band Images.

BSc 2019 **Hacettepe University A**.

- o Program: Electrical and Electronics Engineering
- Rank: 8/130 GPA: 3.3/4.00

HS 2015 Isiklar Air Force Military High School ♠, Rank: 11/171 GPA: 80.03/100.

Abilities, Frameworks & Tools

Languages C/C++, Python, Matlab

Tech C++17, OpenMP, CUDA C/C++, Pytorch, OpenCV, Boost

Publications

Aytekin Erdogan Erdem Akagunduz. FuseFormer: A Transformer for Visual and Thermal Image Fusion. *arXiv.org pre-print*, 2024.

Aytekin Erdogan. A Transformer-Based Approach for Fusing Infrared and Visible Band Images. Master's thesis, Middle East Technical University, 2023.

Aytekin Erdogan. 3D-printed Reflectarray Antenna Design and Fabrication. *Bachelor of Science degree thesis, Hacettepe University*, 2019.

Aytekin Erdogan. Total Quality Management in Training of Airmen. *IJAS Conference, Nevada USA*, 2016.

Scientific Works

- 2023 **CUDA Performance Measuring: A Comparative Study**, High Performance Computing ♠. In this project, I have implemented a vanilla computer vision pipeline from scratch for single-thread cpu, openMP and CUDA. I have measured their performances based on their timings. You can find the code via this link.
- 2022 Lane Detection: A Comparative Study, Computer Vision ★.

 In the course project of Machine Learning, I have implemented a low-level feature lane tracker, and different types of algorithms to compare them. You can find the code via thick.
- 2021 **Low-Light Image Enhancement**, Image Processing **☆**. In the course project of Image Processing, I have implemented low-light image enhancement solutions.
- Real-time Multi-Person Pose Estimation: Lightweight OpenPose Test, Deep Learning .

 In the course project of Motion Capture, I have implemented a stress test for OpenPose network.
- Real Time Semantic Segmentation for Autonomous Vehicles, Deep Learning **?**. In the course project of Deep Learning, I have implemented a semantic segmentation network.
- 2019 **Expire Date Detection with FPGA**, Image Processing and Digital Design **♠**. We tried to detect expire date of a food with image processing algorithms and classify whether it is consumable.
- 2019 A Low-Cost Home Automation Control System Based-on IoT, Internet of Things **?**. In this project, we wanted to model a smart home with a low budged. Details can be found in video.
- 2015 Re-Arranging the Energy Transmission Lines by Considering the Fermat-Steiner Point, Applied Mathematics.
 - Fermat-Steiner point is a special point in a triangle. In this high school project we aim to find minimum distances in a set of arbitrary points in 3D space. We participated in Google Science Fair 2015.
- 2013 Alternative Method To Calculate Volume and Field of Quadratic Parabola, Applied Mathematics. In this high school project we aim to find an alternative method to calculate parabola field and volume using numerical methods. We participated in TUBITAK National High School Science Fair 2013.

Licenses & Certifications

- May 2023 C and C++ SEI CERT Based Secure Coding, by Scademy, ♠.
- Mar 2022 **Self Driving Car Engineer**, by Udacity, **★**.
- Jan 2022 **Scrum Team Member**, by Scrum Inc, **☆**.
- June 2020 **TensorFlow Developer Specialization**, by deeplearning.ai Dr.Laurence Moroney, **A**.
- Apr 2020 The Deep Learning Specialization, by deeplearning ai Dr Andrew NG, A.
- Jan 2020 Machine Learning, by Stanford University Dr Andrew NG, A.

Worth To Mention

- Language Near Native English Speaker, IELTS Academic 7.5/9 TOEFL 102/120.
- Hobbies Social Entrepreneurship.
- Hobbies Debate, Former National Debate Team Candidate.
- Hobbies Swimming, Former Professional Athlete.
