Experience

Apr 2025– **Tech Lead, Autonomous Robotics**, BEYONDTECH🏠.
...
- Leading a multi-national, Europe-based autonomous robotics project, combining technical leadership with product and project ownership
- Translating customer needs into actionable technical plans and roadmaps
- Designing system architecture and guiding implementation as tech lead
- Managing cross-functional, distributed teams across Europe
- Leading client-facing technical discussions and strategic support
- Contributing to full-stack development with a focus on scalable, high-quality systems

Apr 2024– **Tech Lead, AI Product**, EXIN HEALTH🏠.
Apr 2025
- Leading development of ORGenie product to improve operating room intelligence
- Developing and deploying AI models for surgical data analysis
- Expert in instance segmentation, stereo vision, and automatic speech recognition
- Implementing data privacy solutions compliant with GDPR and HIPAA
- Created a video event annotation software for medical procedures

Jun 2022– **Software Engineer- ML Research**, ERICSSON🏠.
Apr 2025
- Recognized as Key Contributor in 2024 and awarded stock options🏠
- Developed enterprise-level software for 5G/6G TN with AI/ML integration
- Mid-Senior C++ Developer for 5G/6G technologies

Sep 2021– **Software Engineer, Autonomous Driving**, FORD OTOSAN🏠.
May 2022
- Designed and implemented multi-sensor calibration and alignment framework
- Conducted research on monocular 2D/3D object detection for autonomous vehicles
- Developed perception systems for obstacle detection in autonomous driving

Aug 2018– **Software Engineer, Computer Vision**, METEKSAN DEFENCE🏠.
Apr 2021
- Created Board Support Packages for Linux distributions
- Developed C++ applications for Xilinx UltraScale Architecture
- Implemented face recognition and license plate recognition systems
- Deployed computer vision solutions on NVIDIA Jetson platforms

Education

PhD 2028 **Middle East Technical University** 🏠.
- Graduate School of Informatics/Computer Science
- Research focus: Computer Vision and Deep Learning

MSc 2023 **Middle East Technical University** 🏠.
- Graduate School of Informatics/Computer Science
- Thesis: A Transformer-Based Approach for Fusing Infrared and Visible Band Images

BSc 2019 **Hacettepe University** 🏠.
- Electrical and Electronics Engineering
- Rank: 8/130, GPA: 3.3/4.00

HS 2015 **Isiklar Air Force Military High School** 🏠, *Rank*: 11/171 **GPA**: 80.03/100.

Technical Skills

Languages C/C++, Python, Matlab

Technologies C++17, OpenMP, CUDA C/C++, PyTorch, OpenCV, Boost

Focus Computer Vision, Machine Learning, Deep Learning, Embedded Systems

Publications

Aytekin Erdogan Erdem Akagunduz. FuseFormer: A Transformer for Visual and Thermal Image Fusion. *arXiv.org pre-print*, 2024.

Aytekin Erdogan. A Transformer-Based Approach for Fusing Infrared and Visible Band Images. Master's thesis, Middle East Technical University, 2023.

Aytekin Erdogan. 3D-printed Reflectarray Antenna Design and Fabrication. *Bachelor of Science degree thesis, Hacettepe University*, 2019.

Aytekin Erdogan. Total Quality Management in Training of Airmen. *IJAS Conference, Nevada USA*, 2016.

Projects

2023 **CUDA Performance Analysis for Computer Vision**, High Performance Computing 🏠.
Implemented a computer vision pipeline from scratch comparing single-thread CPU, OpenMP, and CUDA performance. Conducted detailed timing analysis. Project Link

2022 **Lane Detection: A Comparative Study**, Computer Vision 🏠.
Developed and compared various lane detection algorithms using traditional computer vision techniques. Project Link

2021 **Low-Light Image Enhancement**, Image Processing 🏠.
Developed solutions for enhancing images captured in low-light conditions using advanced image processing techniques.

2021 **Real-time Multi-Person Pose Estimation**, Deep Learning 🏠.
Implemented and optimized a lightweight version of OpenPose for real-time human pose detection.

2021 **Real-Time Semantic Segmentation**, Deep Learning 🏠.
Developed a semantic segmentation network for autonomous vehicles with real-time performance.

2019 **Expiration Date Detection System**, Image Processing 🏠.
Built an FPGA-based system to detect and verify food expiration dates using computer vision.

2019 **IoT-Based Home Automation System**, Internet of Things 🏠.
Designed and implemented a cost-effective smart home system with remote control capabilities.

Certifications

May 2023 **C and C++ SEI CERT Based Secure Coding**, by Scademy, 🏠.

Mar 2022 **Self Driving Car Engineer**, by Udacity, 🏠.

Jan 2022 **Scrum Team Member**, by Scrum Inc, 🏠.

June 2020 **TensorFlow Developer Specialization**, by deeplearning.ai, 🏠.

Apr 2020 **Deep Learning Specialization**, by deeplearning.ai, 🏠.

Jan 2020 **Machine Learning**, by Stanford University, 🏠.

Additional Information

Languages **English (IELTS 7.5/9, TOEFL 102/120), Turkish (Native)**.

Interests **Social Entrepreneurship, Technology for Social Good**.

Activities **Debate (Former National Team Candidate), Swimming (Former Professional)**.
